

Australian Government

REMADE IN AUSTRALIA

Recycling. It has the power to breathe new life into old things. Turning your used tyres into brand new roads, old plastic bottles into playgrounds and mobile phones back into cutting-edge electronics.

The Australian Government is helping industry to transform your rubbish into all sorts of incredible products. Stopping millions of tonnes of waste going to landfill and reducing emissions. Which is good for the environment and good for the country.

Every time you recycle, you're helping remake Australia into a better place for everyone.
