APPROVAL OF AN AQUACULTURE PROGRAM

Hinternoosa Hatchery has been approved as an Aquaculture Program under section 303FM of the *Environment Protection and Biodiversity Conservation Act 1999* and in accordance with EPBC Regulation 9A.19.

Approved species:

- Mary River Cod (*Maccullochella mariensis*)
- Australian Lungfish (*Neoceratodus forsteri*)

This approval allows Hinternoosa Hatchery to apply to the Department of Climate Change, Energy, the Environment and Water for permits to export the approved species, if the specimens being exported are sourced from the approved Aquaculture Program.

A review of this program is required by 25 April 2027.
