

**National Landcare Programme – 20 Million Trees Key Performance Indicators 2014 - 2020**

<b><i>Strategic Objective 3: Communities are involved in caring for their environment.</i></b>
<b><i>Strategic Outcome 3: Increase engagement and participation of the community, including landcare, farmers and Indigenous people, in sustainable natural resource management</i></b>
<b><i>2014 to 2018 Intermediate Programme Outcome 3</i></b> <b><i>By 2018, there has been a demonstrable increase in the level of involvement by the NRM community in protecting, rehabilitating and/or restoring prioritised environmental assets and natural resource management.</i></b>
<b><i>2014 to 2020 Key Performance Indicators – 20 Million Trees:</i></b>
<ul style="list-style-type: none"> <li>• 20 Million Trees projects have engaged and worked cooperatively with the community.</li> </ul>
<b><i>Strategic Objective 4: Communities are protecting species and natural assets</i></b>
<b><i>Strategic Outcome 4: Increase restoration and rehabilitation of the natural environment, including protecting and conserving nationally and internationally significant species, ecosystems, ecological communities, places and values</i></b>
<b><i>2014 to 2018 Intermediate Programme Outcome 4</i></b> <b><i>By 2018, there has been a demonstrable increase in the level of protection, rehabilitation and/or restoration of prioritised environmental assets, threatened species, ecological communities and migratory species.</i></b>
<b><i>2014 to 2020 Key Performance Indicators – 20 Million Trees :</i></b>
<ul style="list-style-type: none"> <li>• Twenty million trees and associated understorey have been planted by the end of 2020 through revegetation, direct seeding and natural regeneration.</li> <li>• Twenty million trees and associated understorey have increased the extent, connectivity and condition of native vegetation that supports native species and their habitat, including threatened species and ecological communities by the end of 2020.</li> <li>• Twenty million trees and associated understorey have contributed to Australia reducing its greenhouse gas emissions by 2020.</li> </ul>

**Note:**

For the purposes of the National Landcare Programme it is recognised that the local landcare and NRM communities will likely differ between NRM regions. These terms capture the breadth of players in this sector and can include stakeholders such as: identified Landcare groups, ‘friends of’ groups and other community environment groups, non-government organisations, farmer/producer groups, Indigenous communities and organisations and individual land managers working in the landcare/NRM sector.
