

# A Decade of Donations for the Environment

## The Register of Environmental Organisations (REO) Report

The report provides information on donations made to environmental organisations to benefit the natural environment

### For the decade (2009–2018)

**\$1.4 billion** was collected in donations.

A small number of organisations collect the majority of donations.

Total donations to organisations on the REO has increased.

Donors are becoming more generous—number of donations over the decade has declined whilst total donations has increased.

Increasingly organisations are focused on **climate change** and **energy** related issues.

### 2018

**\$184 million**

in donations has been reported so far for 2018

**10%** of organisations collected around **80%** of total donations.

Registered organisations reported spending around

**\$181 million**

on **preserving the natural environment** in 2018.

**\$152 million** of this was used in Australia.

**Donations made are predominately monetary**

with a small proportion gifting property.

**\$4.3 million**

in property donations so far for 2018.

### 2019

**639**

**organisations**

are currently on REO

**81%** are also **registered charities**.

**58%**

of organisations are classified as small.
