

National Landcare Programme Sustainable Agriculture Small Grants Round 2015-16 List of Successful Projects

Grant recipient	Project Title	Purpose	GST Inclusive Value (where GST is applicable)	Grant Funding Location
Acacia Park Consulting	Central Flinders Soil and Pasture Re-hydration Project	The project aims to increase the skill and knowledge of landholders to implement landscape rehydration measures on their properties in the Central Flinders Ranges in South Australia.	\$22,206	Quorn, SA 5433
Ag Excellence Alliance Incorporated	Increasing the Effectiveness of Extending Sustainable Agriculture Research by Farming Systems Groups	The project will deliver workshops aimed at building greater industry capacity in sustainable farming and understanding on the value of agricultural extension activities currently undertaken in southern Australia.	\$54,890	Burra, SA 5417
AgForce Queensland Industrial Union of Employers	Improved Awareness and Best Practices to Deal with Fodder Weeds Across Droughted Queensland	The project aims to identify and manage the unintentional introduction of invasive weeds through fodder importation in drought affected areas of Queensland.	\$55,000	Brisbane City, QLD 4003
Agribusiness Yarra Valley Incorporated Formerly Centre Agriculture & Business Yarra Valley Incorporated	Composting Trials for Soil Health and Resilience Improvement in Vineyards in the Yarra Valley	This project is focussed on assisting farmers to implement ground level solutions to improve the health of the soil they farm.	\$16,671	Castella, VIC 3777

National Landcare Programme

Agriculture Kangaroo Island Incorporated	Variable Seasons: Improving Land Management Skills of Kangaroo Island Farmers so They Survive and Thrive	This project aims to increase the capacity and resilience of farmers on Kangaroo Island to deal with variable seasons and facilitate the adoption of proven management practices.	\$43,030	Kingscote, SA 5223
Applied Horticultural Research Proprietary Limited	Building Prosperity and Sustainability by Demonstrating Reduced Tillage, Functional Cover Crops and Compost to Vegetable Growers in Victoria	This project is focussed on building the capacity and skills of vegetable growers in Victoria to farm sustainably.	\$54,450	Eveleigh, NSW 2015
Australian Forest Growers	Multi-Purpose Trees - Building Landowner Capacity for their use in Sustainable Land Management	This project focusses on encouraging the agroforestry industry in a number of regions across Western Australia.	\$55,000	Macquarie, ACT 2614
Barkly Landcare and Conservation Association	Farming Smarter: Connecting Barkly Farm Businesses to Information in a Remote Landscape	The project will deliver a workshop to support farm businesses located within the remote and vast Barkley Tableland region of the Northern Territory.	\$19,320	Tennant Creek, NT 0861
Barrabaroo Landcare Incorporated	Empowering Farmers to be More Productive and Sustainable - Building Capacity in Understanding and Managing Soil Fertility	The project aims to empower farmers to make sustainable decisions about soil management.	\$12,636.36 (Nil GST)	Cobargo, NSW 2550
Basalt to Bay Landcare Network Incorporated	The Green Line - Demonstrating New Methods of Shade and Shelter Construction to Farming Enterprises in South West Victoria	The project will develop two revegetation sites on public land that will demonstrate new methods to create shade and shelter for agriculture in a Victorian Volcanic Plains linear remnant area.	\$46,950	Warrnambool, VIC 3280

National Landcare Programme

Birchip Cropping Group Incorporated	Precision Agriculture - The Sustainable Approach to Farming in the Southern Mallee	This project is focussed on the use of variable rate technology in the cropping industry across a number of regions in Victoria.	\$41,039	Birchip, VIC 3483
Border Ranges-Richmond Valley Landcare Network Incorporated	Maintaining Natural Resources and Productivity on Richmond Valley Farms	The project will deliver workshops aimed at increasing biodiversity and soil health knowledge to cattle producers, dairy farmers and small farming properties in the Richmond Valley.	\$29,040	Kyogle, NSW 2474
Bruie Plains Landcare Group	Pathways to a Bright Future in Agriculture	This Holistic Grazing Management Course will support landholders from the Central West and Western NSW regions, which also includes two field trips.	\$11,000	Trundle, NSW 2875
Brunswick Valley Landcare Incorporated	Keeping our Land Productive - Farmers Sharing, Learning and Planning for a Sustainable Future	The project will deliver a series of workshops and field days in Northern NSW that will cover topics about improving soils and water quality, sustainability, planning and increasing biodiversity.	\$19,083	Brunswick Heads, NSW 2483
Burdekin Productivity Services Limited	Accelerated Adoption of Innovative Practices for Burdekin Young Grower Group	This project will assist a group of young sugarcane growers in the Burdekin region of Queensland to improve their knowledge and technical skills around controlled traffic, reduced tillage, irrigation scheduling and fertiliser management.	\$18,950	Ayr, QLD 4807
Cambooya Landcare Association Incorporated	Identification and Management of Acid Soils in Southern Queensland	The project will assess the impact of soil acidification on agricultural productivity and improve its management in southern Queensland.	\$55,000	Cambooya, QLD 4358

National Landcare Programme

Carnarvon Growers Association Incorporated	Demonstrating and Communicating Best Management Practices for Horticultural Production in the Gascoyne Region	This project is focussed on demonstrating and communicating best management practices for horticultural production in the Gascoyne Region, Western Australia.	\$55,000	Carnarvon, WA 6701
Centralian Land Management Association Incorporated	Promoting and Creating Healthy Landscapes in Central Australia using the EMU Process and Best Practice Soil Conservation Techniques	This project builds the capacity of land managers to plan and execute soil conservation and rehabilitation works using best practice methods, including the use of the Ecosystem Management Understanding process.	\$55,000	Alice Springs, NT 0871
Coffs Harbour Regional Landcare Incorporated	Capacity Building for Sustainable & Biological Farming in the Bellingen/Coffs Harbour region	The project will deliver a series of workshops to farmers on sustainable and biological farming topics in the Coffs Harbour and Bellingen Shires.	\$12,000	Coffs Harbour, NSW 2450
Coffs Harbour Regional Landcare Incorporated	Local Blueberry Industry Market Segmentation Research to Improve Targeting of Behaviour Change Tools for Best Practice	The project will address fertiliser management and improved irrigation management for the large new plantings of blueberries and other high value horticulture crops on the Coffs Harbour Coast.	\$45,400	Coffs Harbour, NSW 2450
Conservation Farmers Incorporated	Conservation Farming Field Days	This project will deliver a number of grower-group workshops on conservation farming across Northern NSW and Central Queensland that will target the cropping industry.	\$27,500	Toowoomba, QLD 4350
Corrigin Farm Improvement Group	Improving Soil Health through Establishment of the Perennial Legume Lebeckia on Non-Wetting Deep Sands	This project aims to improve cereal and pasture production on the deep white sands in the Corrigin area that are currently producing low yields.	\$39,000	Corrigin, WA 6375

National Landcare Programme

DairySA Regional Development Program Incorporated	Leading NRM - Facilitating New Thinking, Adoption and Sustainability	The project will deliver a tailored leadership programme for young professionals in the South Australian dairy industry.	\$43,500	Lucindale, SA 5272
DairyTAS Board Incorporated	Supporting Sustainable Dairying in Tasmania (North)	This project is targeted towards new and expanding dairy farms in Northern Tasmania. It will involve the delivery of the Fert\$mart program, which is an established program that involves the roll-out of the dairy industry's national nutrient management guidelines.	\$44,500	Burnie, TAS 7250
Department of Agriculture and Fisheries	Optimising Nutrient Management in Vegetables for VR Applications	The project includes the establishment of a participatory research project relating to nutrient uptake monitoring of key vegetable crops in the Kalbar region.	\$49,990	Brisbane, QLD 4000
Depview Pty Limited T/Tee Bindaree Family Trust	Comparing Methods to Regenerate Wildlife Corridors and Restore Productivity Using Swales and Treelines	This project will establish a demonstration site for future field days with 1,500 metres of swales on a highly degraded native pasture paddock in Bindaree, NSW.	\$18,070	Garnant, QLD 4702
Derwent Catchment Natural Resource Management Committee Incorporated	Derwent Catchment Pasture Information Hub	This project will establish a pasture information hub through the collection of data from a number of different farms across the catchment area.	\$31,360	Hamilton, TAS 7140
Desert Uplands Build-Up and Development Strategy Committee Incorporated	Tried & Tested: Good Grass Experiences of the Desert Uplands	This project focuses on investigating and documenting strategies that landholders have used, or may be able to use, to successfully manage lands that have been subject to extreme climatic events over the last ten years in the Desert Uplands Bio-region of South Australia.	\$48,500	Barcaldine, QLD 4725

National Landcare Programme

DigsFish Services Proprietary Limited	Establishment of a Community Oyster Gardening Initiative to Facilitate Shellfish Reef Restoration in Pumicestone Passage	The project will, by using the development of oyster beds, improve estuarine productivity and water quality that is centred on the Pumicestone Passage in South East Queensland.	\$51,010	Banksia Beach, QLD 4507
Farm Tree and Landcare Association Incorporated	Your Land, Your horses - Sustainable Horse Property Management Workshop Series	Through a series of workshops, the project will demonstrate the environmental and horse health benefits of the Equicentral System to owners of small horse properties in the Yarra Valley.	\$6,590	Melbourne, VIC 3000
Farm Tree and Landcare Association Incorporated	Containing Stock to increase Productivity in Dry Times	This project will help farmers to reduce soil loss and land degradation, and support them to be more resilient during tough times in the Wimmera, Victoria.	\$38,500	Horsham, VIC 8009
FarmLink Research Limited	Soil Moisture Education for Landowners to Avoid Erosion and Achieve Productivity Outcomes	This project is designed to improve landholder understanding of soil moisture conditions by establishing yield modelling and analysing and interpreting data.	\$55,000	Temora, NSW 2666
Flower Association of Queensland Incorporated	Cut Flower and Foliage Industry - Natural Resource Roadshow	This project will deliver workshops that aim to inform flower and foliage farmers on how to better manage their natural resources.	\$45,124	Cleveland, QLD 4163
Gascoyne Catchments Group Incorporated	Landcare with Cows: Restoring Landscapes and Increasing Heifer Fecundity	The project will demonstrate how degraded soil areas in the Gascoyne region of Western Australia can be rehabilitated whilst simultaneously increasing heifer fecundity, which will address a major constraint to pastoral cattle production in Western Australia.	\$53,600	Carnarvon, WA 6701

National Landcare Programme

Greening Australia (WA)	Sharing Knowledge for Sustainable Agriculture: Biodiverse Native Plant Fodder Systems in the WA Wheatbelt	The project will deliver a number of workshops and field days across the Western Australia Wheatbelt to deliver information about mixed native plant fodder systems, including design and integration into existing farm businesses, on-going management, implementation costs, benefits and estimated annual returns.	\$16,430	Shenton Park, WA 6008
Greening Australia Limited	Empowering Farmers to Identify and Control Buffel Grass to Protect Production Values in Native Pastures of the Southern Flinders Ranges	The project will deliver a series of farmer workshops including demonstration events relating to buffel grass identification and control in the Southern Flinders Ranges.	\$54,680	Pasadena, SA 5042
Gwydir Valley Cotton Growers Association Incorporated	To Report and Extend the Key Outcomes of a Rotation Trial to Improve Productivity and Soil Quality in North West NSW	This project will improve the level of information that is available on cover crops (including legumes) to farmers in the North West New South Wales.	\$17,300	Moree, NSW 2382
Hart Field-Site Group Incorporated	Sustainable Farming from the Start	The project will deliver a series of workshops targeted for young farmers about the importance of sustainability in farming.	\$37,032	Clare, SA 5453
Innisfail District Cane Growers Organisation Limited	Demonstrating Methods for Controlling Five Loss Pathways of Nitrogen in Sugarcane Farming whilst Maintaining or Enhancing Productivity	The project will establish a number of demonstration sites on commercial cane farms in the Innisfail region in order to highlight the methods, advantages and economics of using different types of nitrogen fertilisers to; improve nitrogen use efficiency, reduce inorganic nitrogen loss to the environment and improve cane yields.	\$13,780	Mourilyan, QLD 4858
Irrigation Australia Limited	Demonstrating the Benefits of Variable Rate Irrigation through a Community of Practice	This project focuses on demonstrating the benefits of Variable Rate Irrigation to irrigators through the development of a community of practice.	\$34,450	Mascot, NSW 1460

National Landcare Programme

Kaniva District Landcare	Reducing Agrochemical Dependence through Directional Sowing Techniques in Kaniva	This project will demonstrate the advantages of east-west directional sowing as a technique to assist in the control of weeds, which will increase productivity in cereal crops in the Kaniva region.	\$29,900	Kaniva, VIC 3419
Kooloonong-Natya Landcare Group Incorporated	Improving Production through Sustainable Practices on Deep Sands in the Mallee	The project will identify the underlining constraints and management practices that have contributed to the poor growth and production on deep sands in the Victorian Mallee.	\$33,000	Piangil, VIC 3597
LachLandcare Incorporated	Healthy Soil for Healthy Farms	This project will include a range of training events throughout the Lachlan River Catchment, they will provide information to farmers on soil management including managing soil fertility, structure and carbon through improving grazing management and developing property plans.	\$54,626	Forbes, NSW 2871
Lower Blackwood Catchment Land Conservation District Committee	"Farming The Lower Blackwood" Field Day	The project aims to deliver a field day to provide farmers with information on managing natural resources and best practices for sustainable farming across a range of agricultural industries.	\$5,500	Karridale, WA 6288
Lower Eyre Agricultural Development Association Limited	Managing Soil Acidity on Lower Eyre Peninsula through Development and Delivery of Best Practice Management Growing Productivity and Sustainability	This project includes the development of an innovative pH mapping program for the Lower Eyre Peninsula and investigating the most effective treatment of low pH soils in this area to improve productivity and sustainability.	\$54,310	Port Lincoln, SA 5606
Mackillop Farm Management Group Incorporated	Managing Sub Soil Acidity through on Farm Extension	The project builds on an extension workshop carried out in October 2015 to look at subsoil pH and total dissolved solids levels as restrictive layers to root growth of pasture and cropping on sandy soils in the upper south east region of South Australia.	\$21,960	Padthaway, SA 5271

National Landcare Programme

Macquarie Valley Landcare Group Incorporated	'Smashing Solar Power Barriers for Irrigators'	This project will reduce barriers for irrigators in adopting solar power in the Central West region of New South Wales.	\$9,500	Dubbo, NSW 2830
Mallee Sustainable Farming Incorporated	Mallee Sustainable Farming Conference 2017: 'Sustainable Mallee Farming: Part of the Global Food System'	The project aims to hold a conference that allows farmers, scientists, consultants and policy makers to discuss how the Mallee production system relates to international markets and identify where the global opportunities exist for Mallee farmers.	\$53,300	Irymple, VIC 3498
Mallee Sustainable Farming Incorporated	Assisting Mallee Farmers to Implement Productive, Profitable and Sustainable Paddock Rotations	This project will increase the adoption of productive, profitable and sustainable paddock rotation techniques in the low rainfall Mallee region of Victoria, South Australia and New South Wales.	\$54,856	Irymple, VIC 3498
Map IQ	Increasing Best Management of Deep Soil Acidity in the Eastern Wheatbelt of WA	This project is focussed on managing deep subsurface soil acidity in the Wheatbelt region of Western Australia.	\$20,130	Bassendean, WA 6054
Mary Valley Country Harvest Cooperative	Towards a Future of Sustainable Agriculture in the Mary Valley	The project targets relatively new landholders in the planned Traveston Dam catchment area in South East Queensland.	\$18,250	Dagun, QLD 4570
Mid North Grasslands Working Group	Improved Production from Well Managed Native Grassland Management in the Mid North of SA	This project will increase the knowledge of land managers in mid-North South Australia regarding current best practice techniques in grassland management.	\$49,082	Clare, SA 5453

National Landcare Programme

Mid-Loddon Sub-Catchment Management Group	Increasing the Knowledge and Capacity of mid-Loddon Farmers to Successfully Integrate Sustainable and Profitable Crop and Sheep Production	The project will deliver integrated and sustainable crop and livestock based farming system education to mid-Loddon farmers.	\$20,284	Bendigo, VIC 3554
Mingenew Irwin Group	The Benefits of Cell Grazing in the Northern Agricultural Region	This project will aim to demonstrate the economic and environmental potential of cell grazing in the Northern Agricultural Region of Western Australia.	\$33,250	Mingenew, WA 6522
Mitchell and District Landcare Association Incorporated	Box Gum Woodland - Upper Maranoa Catchment - Managing Woody Regrowth and the Impacts of Buffel Grass	The project will support improved management of natural vegetation communities through a property planning process, with a focus on the application of fire in a landscape where introduced grasses are changing fire behaviour.	\$35,057	Mitchell, QLD 4465
Monaro Farming Systems CMC Incorporated	Soils for Life - Monitoring to Manage the Fragile and the Fertile	This project will improve soil management and address poor sulphur levels in the soil, which has been identified as a constraint to production in the Monaro area.	\$28,100	Bombala, NSW 2632
National Indigenous Pastoral Enterprises Proprietary Limited	Natural Capital Accounts for Rangelands to Underpin Payments for Ecological Services	The project will provide pastoralists in the Rangelands with a way of quantifying the ecological impact and benefit of land management decisions.	\$55,000	Curtin, ACT 2605
National Rural Women's Coalition Limited	E-Leaders Grow, Innovate and Sustain Program	The project aims to provide an integrated learning and community awareness program for a number of rural women around Australia.	\$39,254	Canberra, ACT 2601

National Landcare Programme

New England North West Landcare Network Chairs Incorporated	18th Annual New England North West Landcare Adventure: Feeling The Pulse	This project will deliver a range of extension activities including the 2016 Landcare Adventure which will increase the knowledge and understanding of landholders and community members relating to natural resource management and sustainable agricultural issues within the New England Natural Resource Management region.	\$20,600	Armidale, NSW 2350
Northern Territory Farmers Association Incorporated	Building Resilience in NT Horticultural Row Crops through Integrated Pest Management	The project will deliver demonstration sites and a series of field days showcasing conventional Integrated Pest Management techniques to tropical vegetable growers in the Northern Territory.	\$24,442	Coolalinga, NT 0839
Northern Territory Farmers Association Incorporated	Application Technology: Reducing Risk and Improving Efficacy When Applying Agricultural Chemicals for Farmers and Horticulturalists	The project will focus on reducing risk and improving efficacy in the application of agricultural chemicals used by farmers and horticulturalists in the Northern Territory.	\$13,200	Coolalinga, NT 0839
OceanWatch Australia Limited	Cultivating a Sustainable Future for Shoalhaven & Eurobodalla Oyster Farmers	This project is focussed on supporting the adoption of industry-wide best practice across the oyster industry in the Shoalhaven and the Eurobodalla regions of New South Wales.	\$55,000	Pyrmont, NSW 2009
Palerang Local Action Network for Sustainability Incorporated	Small Farms Network: Delivering Improved Sustainable Agricultural and Land Management Across the South East Region	This project will focus on improving productivity and land management of up to 400 small farms near urban centres.	\$47,000	Bungendore, NSW 2621
Queensland Dairyfarmers' Organisation Limited	"The Secret's in the Soil" - Checks and Balances for Healthy Soils on Darling Downs' Dairy Farms	This project is focussed on improving soil and water quality in the Condamine NRM region of Queensland.	\$54,989	Brisbane City, QLD 4003

National Landcare Programme

Queensland Dairyfarmers' Organisation Limited	Let the Benefits Flow – A Cost-Benefit Analysis of Fertigation in Subtropical Dairying Systems	The project will address the low uptake of fertigation systems across the northern dairy industry by providing dairy farmers in South East Queensland with current and up-to-date information about installing and operating a fertigation system via an on-farm demonstration.	\$49,200	Brisbane City, QLD 4003
Queensland Fruit and Vegetable Growers Limited	Improving Climate Risk management in the Queensland Horticulture Industry Using Best Management Practice Tools	This project will develop a climate risk module for Hort360, Best Management Practice tool for horticulturalists.	\$52,300	Fortitude Valley, QLD 4006
Rangelands Fibre and Produce Association Incorporated	Feed Budgeting and Total Grazing Pressure Management for Sustainable Productivity Improvement	This project is focussed on feed budgeting and total grazing pressure management for sustainable productivity improvement in Rangelands Western Australia.	\$53,928	Mount Magnet, WA 6510
Rangelands Natural Resource Management Western Australia	Collaborative Pastoral Property & Paddock Health Monitoring & Management Workshop	This project will focus on implementing industry best practice by establishing paddock monitoring points across a number of cattle stations in the Northern Territory.	\$9,000	Como, WA 6152
Ravensthorpe Agricultural Initiative Network Incorporated	Sustainable Break Crops in the Ravensthorpe Region	This project is based on demonstration of the use of cost effective break-crops to improve sustainability on a variety of soil types in the South Coast region of Western Australia.	\$55,000	Ravensthorpe, WA 6346
Rendell Family Trust McGuinness Family Trust Toulmin Family Trust Pomeroy Family Trust Louden Family Trust Shanahan Family Trust Griggs-Kennelly Family Trust (RMCG)	Property Management Planning (PMP) for a Variable Climate	This project will assist beef producers to build flexibility and resilience into their business through improving their skills in farm planning for climate variability in the North-West region of Tasmania.	\$45,781	Penguin, TAS 7320

National Landcare Programme

Ricegrowers Association of Australia	Innovative Uses of Legumes in Rice Farming Systems	This project will develop best management practices for a range of rotations and the inclusion of legumes in the rice farming system.	\$45,620	Leeton, NSW 2705
Richmond Landcare Incorporated	Regenerating Our Soils – Raising Awareness and Increasing the Adoption of Sustainable, Viable Farming Systems in the Richmond Catchment	This project includes a series of coordinated workshops and field days that aim to increase the knowledge of land managers of sustainable farming techniques in the Richmond Catchment of New South Wales.	\$24,000	Alstonville, NSW 2477
Rural Business Tasmania Incorporated	Pilot - Project to Up-Skill Livestock Producers, Experiencing Financial Hardship, in Grazing and Pasture Management to Improve Profitability and Sustainability	The project is focussed on up-skilling livestock producers experiencing financial hardship in grazing and pasture management, which will improve both profitability and sustainability of these properties.	\$54,375	Launceston, TAS 7250
South Australian Murray-Darling Basin Natural Resource Management Board	The use of Normalised Difference Vegetation Index (NDVI) to Manage Seeps	This project uses Unmanned Aerial Vehicles with Normalised Difference Vegetation Index technology to track Mallee seeps on two paddocks in order to better determine the relationship between crop stress and excess water in the landscape.	\$19,800	Murray Bridge, SA 5253
South Coast Beef Producers' Association	Sustaining Healthy Soils on the South Coast	This project will create a more skilled farmer network who will be able to make accurate decisions about their soil and land management, reducing environmental impacts.	\$39,300	Berry, NSW 2535
South Gippsland Landcare Network	Innovative Solutions to Controlling Agricultural Weeds	The project aims to build community capacity to control agricultural weeds in West Gippsland, Victoria via a series of education and extension activities.	\$25,300	Leongatha, VIC 3953

National Landcare Programme

South Gippsland Landcare Network	Sustainable Farm Practices for Small Farms, Hill Farms and Lifestyle Farms in the Strzelecki Hills	This project is focussed on sustainable farming in small farms, hill farms and lifestyle farms in West Gippsland, Victoria.	\$36,000	Leongatha, VIC 3953
South Myall Catchment Landcare Group Incorporated	Improve Soil and Pasture Productivity with Nitrogen Fixing Legumes and Medics in Run Down Pasture	This project aims to demonstrate improved management practices on degraded pastures, at the paddock scale, in the South Myall Catchment area.	\$15,030	Kleinton, QLD 4352
Southern Australian Capital Territory Catchment Group Incorporated	Building Resilience in Productive Landscapes in the ACT Region	This project will increase the capacity of peri urban and rural landholders to access best practice information and training in sustainable resource management.	\$55,000	Wanniassa, ACT 2903
Southern Farming Systems Limited	Farmers and Advisors Using Soil Moisture Information for Better Management Decisions	The project will disseminate real time soil moisture information to land managers using an existing network of 60 soil monitors in South West Victoria, Gippsland and North East Tasmania.	\$54,750	Inverleigh, VIC 3321
Southern New England Landcare Limited	Increasing Agroforestry by Delivering Master TreeGrower and Peer Group Mentor Programs in the Southern New England	The project will increase the capacity and knowledge of farmers to productively and sustainably manage grazing lands on the Northern Tablelands NSW.	\$54,982	Armidale, NSW 2350
Stockport/Mallala Soil Constraints Group	Adopting Improved Management Practices to Restore the Landscape after the Pinery bushfire	This project assists landholders to addresses the significant issue of the erosion, soil damage and native vegetation loss in the Adelaide and Mount Lofty Ranges, Northern and Yorke NRM region following the Pinery fire in 2015.	\$54,800	Mallala, SA 5562

National Landcare Programme

Sunfish Queensland Incorporated	Fishers Working Towards Healthy Fish Habitat for Sustainable Fisheries in South East Queensland	This project involves a number of workshops that will support the utilisation of spatial tools to map high value fisheries production areas in south-east Queensland.	\$35,230	Warner, QLD 4500
Tablelands Farming Systems Incorporated	Feeding Farm Resilience - Enhancing Farmers' Ability to Predict, Plan, Respond and Recover from Adverse Seasonal Conditions	This project utilises weather forecasting and management tools to analyse and interpret information provided by a number of existing soil moisture probes in the Tablelands region in order to build farm resilience to adverse seasonal conditions.	\$29,000	Goulburn, NSW 2581
Tamar Region Natural Resource Management Strategy Reference Group Incorporated	Backyards to Broadacres - Maximising Profit and Produce in the Tamar Valley Across Multiple Themes and Scales	The project will undertake a series a NRM workshops to the diverse range of farming enterprises and the wide range of farm sizes in the Tamar Valley, Tasmania.	\$37,590	Launceston, TAS 7250
Tasman Landcare Group Incorporated	Soil Management in the Face of Change	Using a farmer directed action learning program this project will provide primary producers in Tasmania's south-east with the knowledge and capacity to best manage their soils while transitioning to irrigated systems.	\$29,700	Nubeena, TAS 7184
The Liebe Group Incorporated	Innovative Lime Incorporation at West Wubin	The project will educate farmers on the application of deep lime to address acidity in the Northern Agricultural NRM region of Western Australia.	\$39,303	Dalwallinu, WA 6609
The Moore Catchment Council (Incorporated)	Moore Knowledge and Opportunities: Review and Share Learnings from Ten Years of Sustainable Agriculture Projects	This project will review sustainable agriculture projects managed by Moore Catchment Council on farms over the past decade, and assess the achievements and key learning from these projects.	\$54,665	Moora, WA 6510

National Landcare Programme

The Mulloon Institute Limited	Outreach, Engagement and Uptake of Landscape Rehydration Projects by Agricultural Communities	This project will engage with agricultural communities across the country to measure the uptake of the Mulloon Community Landscape Rehydration Project.	\$46,134	Bungendore, NSW 2621
Tobacco and Associated Farmers Co-operative	"Farm Smart" - Adoption of Sustainable Management Practices in the Ovens, King & Kiewa Valleys	This project will target new and emerging agricultural industries in the Ovens, Kings and Kiewa Valleys. The project will deliver events that promote management practices aimed at improving soil health, sustainable production and native vegetation in a farming system.	\$54,960	Myrtleford, VIC 3737
Tully Cane Growers Limited	Better Management of Nutrients on Tully Cane Fields	This project aims to reduce nutrient run-off from cane farms in the Wet Tropics by working with local sugarcane growers.	\$13,356	Tully, QLD 4854
Upper Deep Creek Landcare Network	Property Management Plan Courses Project	This project will deliver a number of property management planning courses to landholders in the Port Phillip and Westernport Region of Victoria.	\$6,928	Woodend, VIC 3442
Upper Gascoyne Land Conservation District Committee	Arid Rangeland Regenerative Management	This project aims to increase the knowledge and capacity of pastoralists to assist them to undertake sustainable rangeland management in the Rangelands region of Western Australia.	\$29,700	Meekatharra, WA 6642
Upper North Farming Systems	Rural Business Management 101 - Up-skilling the Women of the Upper North in Sustainable and Productive Farming Principles	The project will deliver a series of workshops targeted towards rural women in the Upper North of South Australia.	\$7,260	Jamestown, SA 5491

National Landcare Programme

Upper Snowy Landcare Committee Incorporated	Soil Health Field Days on the Monaro	The project will engage landholders in the Southern Monaro area through a two-day soil health workshop to improve soil management in the area.	\$13,640	Cooma, NSW 2630
Waggamba Landcare Group Incorporated	Improving Soil Health and Knowledge Through Hands-on Learning and Actions	The project will help producers in the Border Rivers region of Queensland build their skills in soil health and farm fertility management.	\$16,300	Goondiwindi, QLD 4390
West Midlands Group Incorporated	Reducing the Risk of Nutrient Enrichment by Adopting Variable Rate Irrigation	The project will engage growers in the Gingin and Dandaragan area of Western Australia to encourage the adoption of variable rate irrigation in the horticulture industry.	\$36,674	Dandaragan, WA 6507
Western Landcare NSW Incorporated	Western Landcare Forum 2016	This project supports the Western Landcare Forum, which will be held in Broken Hill in August 2016.	\$55,000	Bourke, NSW 2840
Wet Tropics Soilcare Incorporated	National Biological Farming Conference 2016: Pay Dirt	This project supports the Second National Biological Farming Conference in Cairns, which is expected to improve access to best practice information for farmers.	\$55,000	Babinda, QLD 4861
WetlandCare Australia Proprietary Limited	Healthy Cows in Healthy Wetlands: Native Floodplain Pasture for Agricultural Productivity	The project aims to improve the management of acid sulphate soils on floodplain lands and improve the quality of water leaving floodplain grazing properties and entering the river.	\$54,970	Ballina, NSW 2478

National Landcare Programme

Woody Yaloak Catchment Group Incorporated	Using Historic Soil Tests to Make Better Lime and Fertiliser Decisions	This project will use more than 1200 soil tests collected by farmers in the Woody Yaloak Catchment region to show spatial changes in soil pH, fertility, organic carbon and other soil condition indicators over the past 20 years to improve the information association with common soil types in the region.	\$29,225	Queenscliff, VIC 3225
Yarram Yarram Landcare Network Incorporated	Helping Farmers to Help Fishermen-Erosion Control Measures for the Protection of Corner Inlet's Seagrass Meadows	This project aims to protect and enhance fishing stocks through sea grass habitat protection.	\$55,000	Yarram, VIC 3971
Yarrilinks Incorporated	Assessing Feed On Offer of Cereal Crops and Stubbles for Livestock in Low Rainfall Farming Systems	The project will develop a decision making tool for livestock producers to assess Feed On Offer in the lower rainfall areas of Western Victoria.	\$47,634	Warracknabeal, VIC 3393
