

## **Protected Species Reporting for all Commonwealth Fisheries under the *Environment Protection and Biodiversity Conservation Act 1999***

Species listed under the *Environment Protection and Biodiversity Conservation (EPBC) Act (1999)* fall into four main categories:

- a member of a listed threatened species or listed threatened ecological community,
- a member of a listed migratory species,
- a member of a listed marine species; or
- a cetacean.

Under the Act it is an offence for any person to undertake an activity in a Commonwealth managed area that results in the unintentional death, injury, trading, taking, keeping or moving of a species listed under the Act. However, the Act specifies certain actions are not offences, including actions authorised by a permit or undertaken in accordance with an accredited management plan or regime.

All interactions with listed species, whether authorised or not, must be reported to the Department of the Environment, Water Heritage and the Arts (DEWHA) within seven days. This requirement to report all interactions includes fishers operating in Commonwealth fisheries managed by the Australian Fisheries Management Authority (AFMA). An interaction is considered any physical contact an individual (person), boat or gear has with a protected species including catching and colliding with any of these species.

In 2005, a Memorandum of Understanding (MoU) was agreed between the Managing Director of AFMA and the Secretary of DEWHA. This MoU allows AFMA to report interactions with protected species (listed under the EPBC Act) in Commonwealth managed fisheries to DEWHA on behalf of fishers.

AFMA provides periodical summary reports of protected species interactions, by fishery and sub-fishery, to DEWHA. The record of protected species interactions for all AFMA managed fisheries as reported in fishery logbooks for the period 1 October to 31 December 2007 is below. This record is compiled from official logbook records submitted to AFMA by fishers (concession holders.; All concession holders have agreed to AFMA supplying this data to DEWHA on their behalf. Logbook data is not routinely verified and therefore AFMA cannot attest to the accuracy of this data nor authenticate that this data is a complete record of all interactions occurring in the mentioned fisheries.

All interaction information provided to DEWHA is for information purposes only. Names of persons or boats are not provided. AFMA uses interaction information to develop management arrangements to minimise the likelihood of future protected species interactions.
